Index Engineering was established in August 1996 by a seasoned Engineer. The vision was to create a large and leading international and sub-regional engineering company. The founder believed hard work would make this a reality and wanted to leave a legacy for future generations of professionals. Today Index Engineering is a success story built on shared values and recognition for excellence in the construction industry. Index Engineering has grown substantially over the years. Starting as a civil engineering firm, Index Engineering is now diversified, constantly following the job market. For about two decades, Index Engineering has been reinforcing its presence nationwide, expanding its in-house expertise and enlarging its scope of consultancy and construction services.
